21

22

23

24

25

1 regarding effective communication with patients who
2 are either non-English speaking or deaf?

3 A. That's correct.

4 Q. How are prisoners supposed to access routine
5 health care?

6 A. They can -- they can ask for it by filling out
7 the kite, the IIR sheet that we have.

8 Q. I'm sorry, what was the acronym?

9 A. IIR.

10 Q. IIR, do you know what that stands for?

11 A. Inmate interview request.

12 Q. Also known as a kite?

13 A. Yes.

14 Q. So say I'm a prisoner and I have a routine
15 non-emergency health care need and I want to request
16 care using this process, walk me through how that
17 would work.

18 A. So they would be asking for the request, the
19 form request from staff members and the staff would
20 provide the form. They can fill it out and put it in
21 the box which would be picked up by medical staff and
22 refer to those.

23 Q. And is the process you've just described the
24 same process for medical, mental health and dental?

25 A. Yes.

1 Q. Now, you referred to the patient filling out the
2 form and putting it in the box, tell me about those
3 boxes.

4 A. Every housing unit has a box for the request or
5 any kind of communication device that they would
6 have, and they would put it in those.

7 Q. Is the box locked?

8 A. Some are, I'm not sure they all are locked or
9 not.

10 Q. How long have these boxes been in existence?

11 A. Since I've been here, I'm not sure, with the
12 Department of Corrections in Nebraska, I'm sure they
13 have been there for a while.

14 Q. Have they been here since you -- the entire time
15 you've been medical director?

16 A. Some, some units they do, some have not. And
17 sometimes they will hand it off to director, to the
18 medical staff and/or the officers.

19 Q. Are there units where there's no box for kites?

20 A. I have not seen any, but I believe there might
21 be some place where there are not boxes there.

22 Q. So in that case, what would the patient do when
23 he's completed the kite?

24 A. He will give it to the officer and/or any of the
25 medical staff.

1 Q. Is there policy on what the patient is supposed
2 to do with the completed kite?

3 A. I think there's a policy on that with the
4 general NDCS policies.

5 Q. But not a health care specific policy?

6 A. No.

7 Q. If the patient gives the kite to an officer,
8 what happens next?

9 A. Officer, if it's medically related, he will give
10 it to the nursing staff or the mental health staff.

11 Q. Who specifically is the officer supposed to give
12 it to?

13 A. Any medical staff. I'm not designating any
14 specific person, 'cause eventually it will get you to
15 the nursing station and will sort out the process.

16 Q. Is the officer permitted to read the kite?

17 A. I do not believe so.

18 Q. Is there a policy saying that the officer is not
19 to read the kite?

20 A. No.

21 Q. So how do officers know they're not supposed to
22 read the kite?

23 A. I'm sure part of the training is from the STA to
24 talk discussion about when there's a medical request,
25 they're not supposed to read and give to medical

1 A. Correct.

2 Q. A separate skilled nursing facility record?

3 A. Correct.

4 Q. And also some behavioral health data recorded in
5 NICAMS, correct?

6 A. Correct.

7 Q. And is the optometry record separate or is it
8 part of the medical and mental health chart?

9 A. It's part the medical chart.

10 Q. why is medical information kept in so many
11 different places?

12 A. That's what we trying to improve. I like to
13 have the ones -- everything in one place.

14 Q. Okay. But is there a reason why it's kept in so
15 many different places?

16 A. I don't know. That was one of the things that I
17 came on board, talked about it, consolidating all the
18 records.

19 Q. In your view, would it be better if the records
20 were more consolidated?

21 A. Absolutely.

22 Q. would it be better for patient care?

23 A. Yes.

24 Q. would it be better for patient safety?

25 A. Yes.

1 Q. Have you taken steps to bring about a
2 consolidated medical record?

3 A. Yes, we have.

4 Q. What are those steps?

5 A. Well, we have, right now we trying to
6 consolidate the medical and mental health records
7 into one and the behavioral health site has certain
8 sensitive documentation that counseling relies on,
9 for example, they might be sensitive, they're still
10 kept in the NICAM with restricted access to certain
11 staff members.

12 The dental we try to consolidate into medical
13 portion as well, we taking steps on that one. We
14 have not been successful yet, but we are working on
15 it. And trying to ultimately really looking at the
16 electronic health record to consolidate all the
17 charts. I mean, that's going to be our ideal system
18 to look at it.

19 So as we talked about earlier, we have the RFI
20 for EHR already process and we have some vendors
21 already looking at it and we already had requested
22 through our budget funding for EFR. And I'm hopeful
23 that will be done in the next 12 months or so.

24 Q. But that request has not yet been funded?

25 A. No. But we have a support from some of

1 A. Right.

2 Q. Okay. At any time since you had been medical
3 director and since you became medical director in
4 2017, did corrections officers ever distribute
5 medications to patients?

6 A. Yes, they do.

7 Q. Is that still going on today?

8 A. Yes, they are and they all have been certified
9 for med-aide classes.

10 Q. At which facilities are corrections officers
11 distributing medications to patients?

12 A. we have couple of facilities at NSP, LCC, that
13 I'm aware of.

14 Q. Were -- was there a time that officers were
15 distributing medications at facilities other than NSP
16 and LCC?

17 A. They might have, I'm not aware of that prior, in
18 prior years.

19 Q. Okay. So are you aware of any change in the
20 practice of officers distributing medications to
21 patients that occurred since you've been medical
22 director?

23 A. No. And these are all officers who have been
24 certified in med-aide classes, right? We not talking
25 about the officers who are not certified with giving

1 them pills, so they all have the certification.

2 Q. Okay. So your testimony is that all officers
3 who distribute medication to patients have some
4 certification?

5 A. Yes.

6 Q. Okay. Tell me about that certification.

7 A. The certification class is about three hours
8 that it was provided by a health educator of the
9 process of what needs to be done, how pills are to be
10 distributed, how they are documented. They need to
11 document on the M-A-R sheet and if there are any
12 refusals, they need to document those as well.

13 Q. You said that training is provided by a health
14 educator?

15 A. Yes.

16 0. And what are those person's credentials?

17 A. I don't know offhand.

18 0. And you said the training takes three hours?

19 A. Yes.

20 Q. Is it a one-time thing or does it have to be
21 repeated?

22 A. It has to be repeated, be recertified every two
23 years.

24 Q. And the requirement that officers who distribute
25 medications be certified in this way, is that written

1 down anywhere?

2 A. Yes.

3 Q. Where is it written down?

4 A. I'm not sure where the protocol is but there is

5 one.

6 Q. Now, you mentioned MARS; again, just for the

7 record, what are MARS?

8 A. Medication administration records.

9 Q. And could you just describe briefly what they

10 are?

11 A. So that's a list of, the form actually describes

12 the medication that is given, how often they have to

13 be given and there's a column that goes across the

14 page, talks about who actually signed off, check off

15 to say yes the person took the medication, if they

16 refuse, they put the "R" for refusal and the nursing

17 staff sign off on those.

18 Q. Since you became medical director in 2017, have

19 MARS been consistently used at all NDCS facilities?

20 A. Yes. But we also did an audit recently that we

21 found that they were not being used, so we took some

22 provisions to make that change. And one of the

23 provisions that I did discuss with the director is to

24 move towards electronic monitoring and we just

25 implement that process in the last couple of months.

1 and it reads, quote, these requests are triaged daily
2 by health professionals per a priority system that
3 addresses routine urgent and emergency complaints,
4 end of quote.

5 Do you see that language?

6 A. Yes.

7 Q. Are LPNs included within the definition of the
8 term health professionals in this sentence?

9 A. Yes.

10 Q. And I believe you already testified that sick
11 call requests are sometimes triaged by LPNs?

12 A. Yes.

13 Q. Okay.

14 MR. FATHI: Is this a good time
15 for break?

16 MR. POST: Yes.

17 (whereupon, at 12:04 p.m., a luncheon recess was
18 taken and the deposition resumed at 12:47 p.m.)

19 (Exhibit No. 7, marked for identification.)

20 Q. (BY MR. FATHI) Doctor, this morning you talked
21 on a few occasions about policies that you're
22 thinking of changing but you would like to revise.

23 Since you have been medical director, have you
24 actually changed any written policies?

25 A. Yes.

1 Q. Which ones?

2 A. So one of the policies I came on board quickly
3 was a restraint policy, where the restraint were, I
4 felt new guidelines have changed quite a bit and so I
5 changed the restraint policy to maximum four hours
6 and a minimum two, definitely the person is
7 deescalated then we should be able to take the
8 restraint off. So then we changed that policy.

9 And the other one we developed more defining the
10 levels of care for mental health. And right now we
11 have SM --

12 (Court reporter interrupted for clarification.)

13 A. SMHU, secure mental health housing unit, and
14 there's really the process there is current center
15 base rather than the level of care process we have to
16 treat people who have mental illnesses, but the SMIs
17 were admitted to the patient, that's severe mental
18 illness, so we changed that policy.

19 we also included in our chronic care policy, the
20 SMI was not defined to say how often do we see
21 somebody with a severe mental illness, so my
22 recommendation was to see everybody sees psychology
23 every 30 days, psychiatrist at a minimum of 90 days.

24 We also changed some policies on the diabetics
25 because the diabetic lab studies that needs to be

1 prisoners are receiving medication for mental health?

2 A. That's right.

3 Q. And the number of -- and 70 to 80 percent of
4 prisoners are receiving mental health care of any
5 kind?

6 A. That's correct.

7 Q. Are there different levels of mental health care
8 within NDCS?

9 A. Treatment incentive based for the level of care
10 that we talked about earlier, there's a policy that
11 we have adopted in developing levels of care.

12 There's acute level of care, there's chronic,
13 intensive outpatient and outpatient.

14 Q. And that policy currently exists in written
15 form?

16 A. Yes.

17 Q. And do you recall what it's -- the title or the
18 number?

19 A. I don't recall the number of it, but we try to
20 implement that policy as we speak, make some changes
21 in the system to implement that

22 Q. So is that policy currently implemented?

23 A. we have drafted it and we're going to admit it
24 December 17th

25 Q. Okay, so the answer to my question is no?

1 Q. Is it ever more than three to four per hour?

2 A. There might be some more for the no-shows, so
3 they might book more people and sometimes no-shows
4 and people don't show up so, 'cause might be in the
5 schedule but typically only, don't see more than
6 three or four.

7 Q. Tell me what kind of access the telepsych
8 provider has to the patient's medical record?

9 A. They have access to NICAMS.

10 Q. And how does that physically, how does it occur?
11 How does the doctor in Chicago get access to NICAMS?

12 A. By V, VPN system. So he go log in to the VPN
13 and have direct access to or DOC NICAMS.

14 Q. Do the telepsych providers have access to the
15 patient's paper medical record?

16 A. Physically since they're located at remote site,
17 not really, no.

18 Q. Does the telepsych provider have access to the
19 MARS?

20 A. Yes.

21 Q. How does that happen?

22 A. Electronically, since we implemented the
23 electronic MARS, so...

24 Q. And when were the electronic MARS implemented?

25 A. Over the summer.

1 Q. of 2018?

2 A. Yes.

3 Q. And are they now fully implemented at every
4 facility?

5 A. Every facility except for NSP and DEC.

6 Q. And are patients at NSP or DEC ever seen by
7 telepsych?

8 A. No, we have two part-time psychiatrists who
9 provide coverage at NSP.

10 Q. So patients at NSP and DEC are never seen by
11 telepsych?

12 A. Correct.

13 Q. Does the telepsych provider have access to the
14 patient's kites or other requests for health care?

15 A. They would if they're directed to them, if they
16 would have access to those kites.

17 Q. How would they have access?

18 A. We would electronically send it to them.

19 Q. How would that happen?

20 A. E-mail or when they have a session conducted we
21 have somebody else on the other side with the patient
22 and they will talk about what the visit has been,
23 what the kites are.

24 Q. Other than NICAMS and the MARS, is there any
25 other portion of the medical record that is

1 making that call and then call the nursing, the
2 nurse.

3 Q. Call the nurse at home?

4 A. Well no, that would be in the facility site, we
5 would not have an LPN left alone on the site, so
6 there's always one nurse available.

7 Q. So is your testimony that every facility has at
8 least one RN on site 24 hours a day?

9 A. That's correct.

10 Q. Is there a written policy that governs this
11 situation, a patient having what appears to be an
12 acute psychotic episode?

13 A. No, we don't, not at this time.

14 Q. What does the department do with patients who,
15 whose mental health needs exceed what the department
16 can provide, who need an inpatient level of care?

17 A. I think the training that we have, the
18 psychiatrist, I believe that we can handle most of
19 the levels of care that we can provide. But if they
20 exceed that level of care, we do collaborate with
21 LRC, Lincoln Regional Center, and we'll transfer the
22 patients over there.

23 Q. I remember reading in some document that the
24 department can't transfer patients to LRC; is that
25 correct?

1 A. They can't not?

2 Q. Cannot.

3 A. No, that's not true, we can.

4 Q. Does LRC have the right to refuse them?

5 A. Sure.

6 Q. Does LRC -- does it ever happen that you want to

7 transfer someone and LRC refuses them?

8 A. Not in the last two years that I know of.

9 Q. In the last two years, about how many NDCS

10 patients have been transferred to LRC?

11 A. we have not transferred anyone. we had the

12 inclination to actually do the collaborative work

13 with LRC so their psychiatrist came over to see the

14 patient at DEC and we do the treatment plan together.

15 Q. So no NDCS patients have been transferred to LRC

16 since you've been medical director?

17 A. No, there hasn't been the need.

18 Q. Have any NDCS patients been transferred to any

19 inpatient facility since you've been medical

20 director?

21 A. No.

22 Q. Do you have any transfer options besides LRC?

23 A. UN -- the UNMC would be the only other option

24 that we go with.

25 Q. The what?

1 A. They are tracked on NICAMS. They would be
2 entering the progress notes and the data on there and
3 that's where it would be tracked at.

4 Q. So if I wanted to know how many different
5 prisoners received individual therapy last month,
6 that report could be run on NICAMS?

7 A. Yes.

8 Q. And if I wanted to know the total number of
9 hours of individual therapy provided, that report
10 could be run on NICAMS?

11 A. We that could be provided from NICAM as well.

12 9. How long has that capability existed in NICAMS?

13 A. I believe since last year or so. I'm not sure.

14 0. since 2017 or 20 --

15 | Page | A - 2017 -

16 Q. Is the patient's access to individual therapy
17 affected in any way if he or she is in restrictive
18 housing?

19 A No

20 Q. Okay. Let's take a break.

21 (Whereupon at 2:38 p.m., a recess was taken and
22 deposition resumed at 2:50 p.m.)

23 Q. (BY MR. FATHI) Doctor, before the break, you
24 testified that you haven't asked for any additional
25 positions to be allocated, to be funded by the

1 legislature any additional health care position; is
2 that correct?

3 A. That's correct.

4 Q. Have you ever asked in any context for the
5 ability to increase the compensation of health care
6 staff?

7 A. Yes.

8 Q. Tell me about that.

9 A. I brought it up to our director we got
10 compensation for health care staff, especially
11 nursing and dentist, dental assistants, dental
12 hygienist, tried to be comparable to the marketplace.

13 we had some conversation with HR who also had
14 conversation with HR in the capitol, Jason Jackson to
15 talk about since we have nursing staff who are
16 uniquely qualified to do lots of different functions,
17 you know, their skill sets are actually a lot more
18 unique compared to what hospitalization is, so they
19 have to be ER nurses at times, they have to be trauma
20 nurses at times, they have to be palliative nurse at
21 times, have to be post operative nurses at times,
22 hospice nurses, and we end up getting some of the
23 nurses, initially we train them and then they end up
24 leaving us because that's partly due to the salary
25 issues.

1 And I know they, a couple years ago they had a
2 meeting with the state trying to look at the
3 compensation for nursing and somehow the psychiatric
4 nurses LRC look at special cases and their
5 compensation was much more than our nurses. We we've
6 been having this ongoing dialogue and part of the
7 issue is the nurses have been represented by the
8 bargaining unit, so we cannot change the union rules
9 so that's the process we have to go through.

10 But, you know, the director has actually gone to
11 legislature and talked about those issues as well to
12 bringing it to the attention that at least we should
13 have same playing level field so we can recruit some
14 nurses.

15 We go through contract nurses obviously paying a
16 higher rate and does not a morale boost for our staff
17 nurses. So the things we have done, we advertise, we
18 try to look at some of the collaboration with some of
19 the universities, the colleges.

20 We recently, we actually even thought about
21 going to international nursing. We just recruited
22 two nurses who are going to be starting this week
23 from Kenya, with the intention that they -- we will
24 train them here, they will work here for a while and
25 on contract for two years and then hopefully they

1 will pay back to the state with the DOC for two
2 years. So it's been an ongoing conversation with
3 anybody who will listen to me.

4 Q. Have you had any success in your efforts to
5 increase compensation for health care staff?

6 A. I had some success and some failures, obviously.
7 I was able to recruit for compensation for nurse
8 supervisors, so that was about -- talking about a
9 year and a half, which just happened about two months
10 ago. But I was not able to get some compensation
11 with director of nursing, two or three ADONS.

12 I continue doing, advocating for other staff
13 too. Salaries are so low for dental hygienist, it's
14 12 bucks an hour. Nobody's going to work for that.
15 And trying to tell, that's basically minimum wage
16 anymore, so some places how do we -- provide some
17 either compensation and/or some benefits, or some
18 tuition reimbursement for processes, so those are
19 being all looked into.

20 Q. Have you been able to secure any increased
21 compensation for nurses?

22 A. No, partly because I think I'm told that since
23 they're part of the bargaining unit, so they have to
24 follow the union contract. And we do tell the nurses
25 to go tell the union to fight for you, the numbers

1 A. Yes.

2 Q. what if a patient sends in a kite and describes
3 a medical emergency, what happens?

4 A. That person would be seen immediately.

5 Q. And how do patients request to be seen
6 immediately if they believe they have a medical
7 emergency?

8 A. If, if the kite is sent to medical staff, they
9 would go and do the assessment.

10 Q. Are you familiar with what's called an emergency
11 grievance?

12 A. Yes.

13 Q. Could they also use that process?

14 A. Yes.

15 Q. what if a patient notify a correctional officer
16 of a medical emergency?

17 A. And he's obligated to provide that information
18 to the medical staff and the medical staff will
19 follow up with that.

20 Q. Are you aware of any instances where a
21 correctional officer was provided that information
22 and did not notify medical staff?

23 A. Not that I am aware of.

24 Q. Earlier you also mentioned that you cannot train
25 a correctional officers in diagnosis of medical

1 more programming in the restricted housing.

2 Q. So individuals in restrictive housing can and do
3 receive group therapy?

4 A. Yes.

5 Q. Would you like to provide them more group
6 therapy?

7 A. Yes, definitely.

8 Q. Again, as we talk about restrictive housing, do
9 mental health and medical staff, I guess it would be
10 mental health staff, do they do walk-through
11 counseling sessions?

12 A. No.

13 Q. So if you've heard that phrase, what do you
14 think it's referring to?

15 A. What I hear going through walk-through is door
16 to door, they really just doing a wellness check,
17 talking about are you taking the medication and
18 medication effective, is there other issue we need to
19 address, are you having any side effects, but if they
20 need to talk about any specific counseling questions
21 they have, that's -- they will actually be taking to
22 patient out in a space, a private room to talk about
23 it.

24 Q. Are there instances where the patient -- they're
25 unable to take the patient out into a private room?
